WHY ARE WE DOING THIS

Surfing is a lifestyle. It can become part of your DNA, your connection to the ocean and environment, your interaction and engagement with community.

Surfing fosters respect for the earth and others, mindfulness, presence, discipline, freedom, self expression, fitness and friendship.

As we strive for social, political and economic equality across all sectors of public life, Surfing Victoria understands the need to lead the way and inspire more Women and Girls through surfing.

This strategy is committed to greater gender equality in the sport, to make surfing more inclusive, accessible and enjoyable for all.

WHAT IS HER BARRIER

FEAR OF JUDGEMENT

Fear of Judgement is identified in Australian research as a national barrier for females participating in sport across all life stages and can take many forms.

- Body image concerns are present at all life stages. Feeling intimidated and/or embarrassed to exercise in public and in a wetsuit or not having the right equipment
- More active women fear that they can't perform as well as they use to,
- During adolescence many girls feel a social disconnect, creating apprehension on how they fit into sport.
- Many mothers feel guilty about spending time exercising as they fear it will be perceived as self-indulgent or implies she is neglecting her maternal duties.

WHAT IS HER BARRIER

LACK OF POSITIVE ROLE MODELS

- If she can't see it, she can't be it
- Women go where women are
